Contents of Volume 17

NUMBER 1 FEBRUARY 1988

Editorial 1

Uncertainties in Mass Absorption Coefficients in Fundamental Parameter X-Ray Fluorescence Analysis 3
B. A. R. VREBOS AND P. A. PELLA

Thick Target X-Ray Yields from Proton Bombardment 13
A. A. KATSANOS, A. ARAVANTINOS AND N. KALLITHRAKAS-KONTOS

A Flux for the Fusion of Samples in Analysis by X-Ray Fluorescence Spectrometry 17
B. T. EDDY AND A. M. E. BALAES

Measurement of the Dead Time of XRF Detection Systems using a Pulsed Beam 19
L. MÉRAY

Yield Calibration Stability of a Si(Li) X-Ray Detector System in a PIXE Experimental Setup Over a Period of 3 Years in the 0.9–9.5 keV Photon Energy Range 23
E. BOMBELKA AND F.-W. RICHTER

K-Shell Fluorescence Yields of Some Elements from Nuclear Decay Parameters 29
N. P. S. SIDHU, B. S. GREWAL AND H. S. SAHOTA

Quantitative Estimates of Potassium in Whole Blood Samples from Diabetics 33
N. VENKATESWARA RAO, S. B. REDDY, D. G. S. NARAYANA, G. SATYANARAYANA AND D. L. SASTRY

NUMBER 2 APRIL 1988

Editorial 41

Absolute Method for Determination of Metallic Film Thickness by X-Ray Fluorescence 43
C. VÁZQUEZ, D. V. de LEYT AND J. A. RIVEROS

Deconvolution Problems and Information Theory 47
J. NUÑEZ, L. E. REBOLLO NEIRA, A. PLASTINO, R. D. BONETTO, D. M. A. GUÉRIN AND A. G. ALVAREZ

Photon-Excited K X-Ray Fluorescence Cross-Section Measurements for Some Low-Z-Elements 53
A. RANI, R. K. KOSHAL, S. N. CHATURVEDI AND N. NATH

Optimization and Coupled Absorption Effects in Diamond Anvil Energy-Dispersive X-Ray Diffraction Measurements 55
M. E. CAVALERI AND J. H. STOUT

Comparison of Fundamental Parameters Programs for Quantitative X-Ray Fluorescence Spectrometry 63
D. B. BILBREY, G. R. BOGART, D. E. LEYDEN AND A. R. HARDING

Method for the Determination of Mg and Si Contents in Aluminium Alloys 75
I. SZALÓKI

NUMBER 3 JUNE 1988

Editorial 83

Sample Preparation Method for Major-Element Analyses of Carbonate Rocks by X-Ray Spectrometry 85
B.-S. KING AND D. VIVIT

Unification of Fundamental Matrix Correction Methods in X-Ray Fluorescence Analysis. Arguments for a New Binary Coefficient Approach 89
R. TERTIAN

Average L Shell Fluorescence Yields from L Shell Vacancies in Radionuclides 99
H. S. SAHOTA, R. SINGH AND N. P. S. SIDHU

Modification of Philibert–Tixier ZAF Correction for Geological Samples 103
M. FIALIN

Quantitative XRF Analysis of Surface Layers: Influence of Primary Energy Distribution and Enhancement 107
V. RÖSSIGER

Problems of Automated Qualitative X-Ray Fluorescence Analysis. 2—Location of Maxima and Line Identification 117
JU. JORDANOV, TS. TSANOV, R. STEFANOV, N. JORDANOV, H. M. ORTNER, P. WILHARTITZ AND R. JENUL

NUMBER 4 AUGUST 1988

Editorial 125

X-Ray K Absorption Studies on Some Cobalt Thiosemicarbazones 127
B. D. SHRIVASTAVA, S. K. JOSHI AND K. B. PANDEYA

X-Ray K Absorption Spectroscopic Study of Some Schiff-Base Polymers of Cobalt 133
P. V. MUJUMDAR, P. C. DESHMUKH, V. B. SAPRE AND N. S. BHAVE

A General Way of Solving Matrix Effect Problems in Elemental Analysis by EDXRFS 139
I. ORLIC, J. MAKJANIC, D. RAOS AND V. VALKOVIC

Loss-on-Ignition Corrections in the XRF Analysis of Silicate Rocks 145
B.-S. KING AND D. VIVIT

New Organic Crystals as X-Ray Monochromators: Triphenylbenzene and Thallium Tartrate 149
M. CHARBONNIER, M. ROMAND AND B. GRUBIS

Precise Calibration of Sequential X-Ray Spectrometers 155
Z. SPERLING

A New Approach to the Particle-Size Effect Correction in the X-Ray Fluorescence Analysis of Multimetallic Ore Slurries 161
M. LANKOSZ

NUMBER 5 OCTOBER 1988

Editorial 169

Quantitative Trace Element Determination in Thin Samples by Total Reflection X-Ray Fluorescence Using the Scattered Radiation Method 171
C. T. YAP, R. E. AYALA AND P. WOBRAUSCHEK

X-Ray Spectrometric Determination of Minor Element Contents in Stainless Steels 175
A. N. SMAGUNOVA, E. I. MOLCHANOVA, L. N. PLINER AND A. L. FINKELSHTEIN

Structural Studies on Heat-treated Pyrophyllite Mineral by Scanning Electron Microscopy 181
S. S. AMRITPHALE AND M. PATEL

Studies on the Variation of Cell Dimensions of Mullite with Iron Oxide and Titania Additions 187
P. DAS AND R. CHOUDHURY

Shape and Extended Fine Structure of the X-Ray K-Absorption Discontinuity in Some Cobalt Mixed-Ligand Complexes 189
P. V. KHADIKAR

Determination of Some Trace Elements in High-Purity Tantalum Metal by Thin-Film X-Ray Fluorescence Spectrometry 195
B. T. EDDY AND A. M. E. BALAES

Investigations Towards Optimizing EDS Analysis by the Cliff–Lorimer Method in Scanning Transmission Electron Microscopy 201
H. HOEFT AND P. SCHWAAB

NUMBER 6 DECEMBER 1988

Editorial 211

XANES Study of Tungsten L_{III} Discontinuity in Some Rare Earth Tungstates 213
A. D. VISHNOI, V. B. SAPRE AND C. MANDE

X-Ray Fluorescence Analysis of Samples with Elemental Sulphur. Effect of Sulphur Sublimation 217
J. S. CHINCHON, A. LOPEZ-SOLER, A. TRAVERIA AND R. VAQUER

Quantitative Determination of Gold in Ore Using Energy-Dispersive XRF Spectrometry 219
M. KASRAI, L. FOZOONMAYEH AND H. PAYROVAN

Soft X-Ray Spectroscopic Study of the Mo_xNi_{1-x} and $Cu_{70}Zn_{30}$ Alloys 223
K. LAWNICZAK-JABLONSKA, J. A. LEIRO AND L. I. NIKOLAEW

Absorption and Fluorescence Corrections of Characteristic X-Rays from Thin Spheres 229
N. A. ZREIBA AND T. F. KELLY

X-Ray Fluorescence Analysis of Zinc–Aluminium Binary Alloys by Mathematical Correction of Matrix Effects 239
K. V. G. KUTTY, S. RAJAGOPALAN AND C. K. MATHEWS

Author Index 244
